I have a mac and where is the hex file to update the firmware The Driver Update Tool – is a utility that contains more than 27 million official drivers for all hardware, including bluetooth low energy hid device driver.. There've likely been some security patches and security updates since then That's unfortunately rather old and might not even have TLS 1.

I *hoped* it would be in my car or at home somewhere I downloaded this and figured out which set of numbers/letters (as noted in other comments) it must have been by which one was moving up and down the most drastically when I moved around the house.
